

# Strengths and Weakness

Firstly, our strengths are money, black tokens, infrastructure and population. Money is one of our strengths because our team has a lot of money. We also have a black token which is good because it means that we are role models to other countries. We also have a lot of land (infrastructure) that our population card goes.

Secondly, our weakness is blue and green tokens. Blue tokens mean that immigrants are negatively treated. Green tokens mean that indigenous people are negatively treated which is bad so our team must try to get rid of the blue and green tokens.
